Quality Management Solution (QMS)

Topic

Citizens staff is requesting approval to enter into a contract with J.Lodge, LLC (J. Lodge), a Cognosante Company, for the purchase, implementation and use of MyQuality, a cloud-based Quality Management Solution (QMS). The base term will be five (5) years with three (3) optional one (1) year renewals. Approval is requested for a total contract amount not to exceed \$1,497,325 for software, implementation, and associated support and services through the base term and subsequent renewals.

History

Citizens Quality Improvement Team monitors, and reviews call and task-based transactions for Underwriting, Consumer & Policy Services, Vendor Management, and Agency and Market Services to provide employee feedback and make recommendations for improved process performance. In addition, the team conducts calibration sessions internally and with vendor partners, addresses scoring reviews, and provides comprehensive dashboard reports monthly and/or quarterly to the business units supported. During the twelve-month period of November 2021 through October 2022, the Citizens team of 12 quality evaluators completed over 36,000 quality reviews. The team uses an internally developed application named QCenter, a solution built using Microsoft Access and requiring 1.25 resources (made up of contingent and Citizens employee) annually to support. The cost of these FTEs is \$207,940, and the annualized cost of the QMS is \$187,166.

Citizens issued Invitation to Negotiate No. 21-0014 to procure a cloud based QMS and received eight (8) vendor responses. Following negotiations with the top four (4) ranked vendors, J.Lodge was selected as the best value solution, offering a SaaS solution called MyQuality. Pricing from J. Lodge was the lowest bid received for a combined call / task quality system including implementation fees, professional services, and single sign on (SSO).

While the primary purpose of this procurement is to replace an internally developed end user computing platform which is experiencing production support issues, MyQuality has several areas of benefit, including system integration, risk reduction, scalability, productivity, functionality, and cost efficiency. It is a SaaS based solution providing a framework of important capabilities and benefits including the ability to track premium changes due to error corrections, reducing internal support risk, legacy-built architecture, offering quality automation and compliance tracking across Citizens, and cost efficiency based on a comparable price point to the current solution.

Executive Summary

Actuarial & Underwriting Committee Meeting, December 6, 2022

Board of Governors Meeting, December 7, 2022

Benefits:

Cost Efficient: MyQuality is less expensive to support than continuing with QCenter.

Increased Productivity: QCenter has been experiencing slower response time and intermittent errors over the past 6-12 months which is impacting user productivity. Moving to MyQuality, a vendor-supported cloud solution, is expected to yield a 10-15% increase in productivity. This will allow the QI team the ability to conduct additional evaluations and/or the availability to focus on value-add research and analysis for better business-unit insights.

Enhanced Functionality and Industry Leading Practices: J. Lodge, an expert in quality management capabilities, routinely adds capabilities and leading practices to their QMS. It is anticipated that the benefits will further enhance the effectiveness and productivity of the Citizens Quality Improvement Team.

Reduced Risk: QCenter is an internally built legacy application that is maintained by limited specialized contractor and support staff. MyQuality uses current cloud technology and is supported by J. Lodge.

Scalable to Citizens: QCenter was very targeted in its application whereas MyQuality has additional capabilities and features that could be leveraged for expanded uses such as automating manual quality processes within various Citizens teams, thereby improving their effectiveness and productivity.

Integration with Core System: QCenter is not integrated with Citizens' PolicyCenter and is unable to track premium changes (savings). MyQuality can be integrated with PolicyCenter or other Citizens applications, providing the ability to aggregate data and identify trends. In addition, this integration will automate reporting, allowing for self-service, by the Citizens Quality Improvement Team's business partners.
